Contents Volume 167

1 A fresh view on the tolerance approach to sensitivity analysis in linear programming
C. Filippi
20 Phase I cycling under the most-obtuse-angle pivot rule
P. Guerrero-García and Á. Santos-Palomo
28 Non-differentiable higher-order symmetric duality in mathematical programming with generalized invexity
S.K. Mishra
35 Beam search heuristic to solve stochastic integer problems under probabilistic constraints
P. Beraldi and A. Ruszczyński
48 Improved local search algorithms for the rectangle packing problem with general spatial costs
S. Imahori, M. Yagiura and T. Ibaraki
68 Data dependent worst case bounds for weighted set packing
R.H. Kwon
77 A hybrid genetic algorithm for the job shop scheduling problem
J.F. Gonçalves, J.J. de Magalhães Mendes and M.G.C. Resende
96 A stochastic programming approach for supply chain network design under uncertainty
T. Santoso, S. Ahmed, M. Goetschalckx and A. Shapiro
116 Cooperative flow dynamics in production lines with buffer level dependent production rates
R. Filliger and M.-O. Hongler
129 A two-echelon inventory system with transportation capacity constraint
H.C. Huang, E.P. Chew and K.H. Goh
144 Ergodicity and analysis of the process describing the system state in polling systems with two queues
R.E. Lillo
163 Queueing network model for a single-operator machine interference problem with external operations
T. Yang, R.-S. Lee, M.-C. Chen and P. Chen
179 Queueing systems with leadtime constraints: A fluid-model approach for admission and sequencing control
C. Maglaras and J.A. Van Mieghem
208 An interval-parameter fuzzy two-stage stochastic program for water resources management under uncertainty
I. Maqsood, G.H. Huang and J.S. Yeomans
226 Using the sum-of-uniforms method to generate correlated random variates with certain marginal distribution
J.-T. Chen
243 The selection and scheduling of telecommunication calls with time windows
A. Amiri

doi:10.1016/S0377-2217(05)00105-0

257 Different approaches to efficiency analysis. An application to the Spanish Trawl fleet operating in Moroccan waters
I. Herrero
272 Group technology in a hybrid flowshop environment: A case study
C. Andrés, J.M. Albarracín, G. Tormo, E. Vicens and J.P. García-Sabater

283 A comparison of branch-and-bound algorithms for a family scheduling problem with identical parallel machines
S. Dunstall and A. Wirth
297 Approximation schemes for job shop scheduling problems with controllable processing times
K. Jansen, M. Mastrolilli and R. Solis-Oba
320 Dynamic transport scheduling under multiple resource constraints
M.J.R. Ebben, M.C. van der Heijden and A. van Harten
336 Modeling the reentrant job shop scheduling problem with setups for metaheuristic searches
J. Zoghby, J.W. Barnes and J.J. Hasenbein
349 Optimal management of cross-trained workers in services with negligible switching costs
O. Berman, J. Wang and K.P. Sapna
370 Cooperation between multiple news-vendors with transshipments
M. Slikker, J. Fransoo and M. Wouters
381 An interactive method for inventory control with fuzzy lead-time and dynamic demand
J.K. Dey, S. Kar and M. Maiti
398 Environmental considerations on the optimal product mix
P. Letmathe and N. Balakrishnan
413 Dynamic, customer-oriented improvement of supply networks
W. Jammernegg and P. Kischka
427 A characterization of concordance relations
D. Bouyssou and M. Pirlot
444 Solving influence diagrams with fuzzy chance and value nodes
L.J. Rodríguez-Muñiz, M. López-Díaz and M.Á. Gil
461 On policy capturing with fuzzy measures
D. Liginlal and T.T. Ow
475 Playing for time: A sequential inspection game
R. Avenhaus and M.J. Canty
493 A novel technique of object ranking and classification under ignorance: An application to the corporate failure risk problem
M.J. Beynon
518 Forecasting business profitability by using classification techniques: A comparative analysis based on a Spanish case
J. de Andrés, M. Landajo and P. Lorca
543 A Lorenz–Pareto measure of pure diversification
M.D. Troutt and W. Acar
550 Dynamic optimization of the operation of single-car elevator systems with destination hall call registration: Part I. Formulation and simulations
S. Tanaka, Y. Uraguchi and M. Araki
574 Dynamic optimization of the operation of single-car elevator systems with destination hall call registration: Part II. The solution algorithm
S. Tanaka, Y. Uraguchi and M. Araki

589 Editorial: Multicriteria scheduling
V. T'kindt and J.-C. Billaut
592 Multicriteria scheduling
H. Hoogeveen
624 A new bounding mechanism for the CNC machine scheduling problems with controllable processing times
R.K. Kayan and M.S. Akturk
644 Decentralised, multi-objective driven scheduling for reentrant shops: A conceptual development and a test case
G. Miragliotta and M. Perona
663 A multiobjective evolutionary algorithm for scheduling and inspection planning in software development projects
T. Hanne and S. Nickel
679 Generating efficient schedules for identical parallel machines involving flow-time and tardy jobs
J.N.D. Gupta and A.J. Ruiz-Torres
696 A Multi-Objective Genetic Algorithm for mixed-model sequencing on JIT assembly lines
S.A. Mansouri
717 Genetic local search for multi-objective flowshop scheduling problems
J.E.C. Arroyo and V.A. Armentano
739 Punctuality and idleness in just-in-time scheduling
F. Sourd
752 Bicriteria train scheduling for high-speed passenger railroad planning applications
X. Zhou and M. Zhong
772 A multi-objective simulated-annealing algorithm for scheduling in flowshops to minimize the makespan and total flowtime of jobs
T.K. Varadharajan and C. Rajendran
796 Two-machine shop scheduling: Compromise between flexibility and makespan value
C. Esswein, J.-C. Billaut and V.A. Strusevich
810 Contents Volume 167
813 Invited Reviews and Invited Tutorials 2001–2005
815 Feature Clusters and Feature Issues 1996–2005
817 Keyword Index Volumes 160–167
827 Author Index Volumes 160–167
